

King County DNRP Water Quality Index

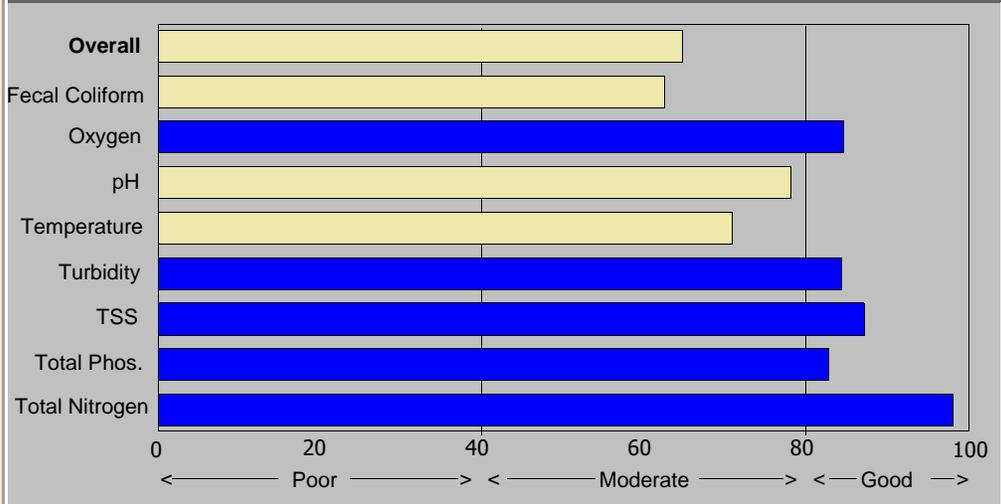

STATION **631** WATER YEAR **2018**

GAUGE # 25A Issaquah Creek at SE 56th ST Overall Index **65**

Issaquah Creek has been monitored for water quality by King County at three sites. Station 0631 is located near the mouth of the creek at the bridge on SE 56th, east of Lake Sammamish State Park. Water quality sampling at station 0631 began in 1972 and continues today. Issaquah Creek originates along the slopes of Cougar, Squak, Tiger, and Taylor mountains and covers 39,000 acres before draining into Lake Sammamish. Issaquah Creek has been identified as a Regionally Significant Resource Area because of its exceptional fisheries habitat, though the expected population growth within the basin (18% by 2020) could threaten this status. Issaquah Creek is currently listed on the Washington Department of Ecology's 303(d) list, Category 5, for violation of dissolved oxygen and temperature standards, and Category 4a for fecal coliform bacteria.

Annual Water Quality Index Scores

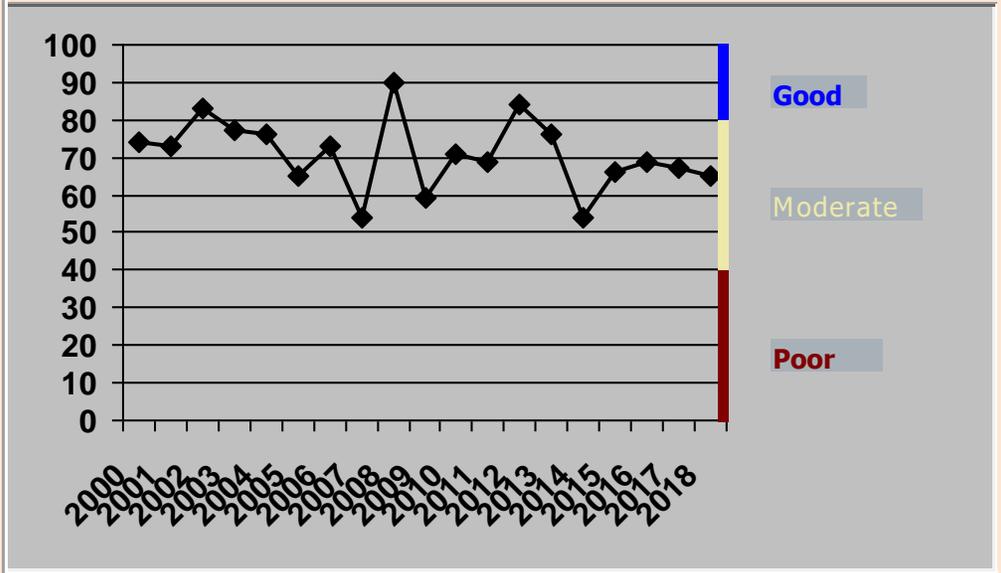

Water quality was MODERATE based on data collected 10/1/2017 to 9/30/2018.

WQI Score Comparison By Water Year

About The Water Quality Index:

The Water Quality Index (WQI) score is a unit-less number ranging from 10 to 100: the higher the number, the higher the water quality. Scores are calculated from data collected during the monthly routine sampling. For temperature, pH, fecal coliform bacteria, turbidity, and dissolved oxygen, the index expresses results relative to levels required to maintain beneficial uses according to criteria in Washington's Water Quality Standards, WAC 173-201A. For nutrient and sediment measures where there are no standard, results are expressed relative to guidelines for this eco-region. Results from the eight parameters are aggregated over time to produce a single score for each sample station. In general, stations scoring 80 and above did not fail water quality standards or guidelines and are of "low concern", scores 40 to 80 indicate "moderate concern", and water quality at stations with scores below 40 are of "high concern". For more information about the WQI please visit <https://green2.kingcounty.gov/streamsdata/WQI.aspx>
